# ABOUT

Our software company Tax Ireland Solutions Ltd under contract from the Department of Environment has developed this Property Charge Management System. The system will allow property owners to register each of their properties and to pay the property tax due for the properties. Property tax is a yearly tax on a property and it is due to be paid on Jan 1<sup>st</sup> each year. Property owners are able to view a list of their properties and the tax that is due currently per property and also any overdue tax (hasn't been paid for a previous year) and are able to query specific previous years and get a balancing statement for any particular year or property. The system maintains a record of all payments of the property charge on a yearly basis.
